

## 1/5HP 3.5CFM Air Pump and Manifold Gauge Set – A/c Refrigerant Set

### Description

### Trusted Efficiency for A/c & Refrigeration Systems

Update your a/c and refrigeration upkeep with this high-efficiency 1/5HP 3.5CFM air pump and manifold gauge set. Created for expert and do it yourself usage, this total set assists you attain accuracy when leaving and charging HVAC systems. Whether you're working on A/C units, refrigerators, or heat pumps, this tool delivers the power and accuracy needed for optimal performance.

### Powerful 1/5HP Vacuum Pump

Equipped with a heavy-duty single-stage vacuum pump, this unit provides a stable and high-performance vacuum to remove moisture and contaminants from your system before charging. It operates at 3.5 CFM with an ultimate vacuum of 40 microns, ensuring a deep and efficient evacuation process. The durable design and powerful motor make it an essential tool for heating and cooling technicians and home mechanics alike.

### Premium Manifold Gauge for Accurate Readings

The included manifold gauge set allows precise pressure measurement for various refrigeration systems. The rubber-wrapped gauge is built to withstand drops and harsh conditions, ensuring long-term durability. It features common refrigerant scales, making it easy to use for A/C systems, refrigerators, and other cooling applications.

### High-Quality, Leak-Proof Hoses

The set includes three high-strength, color-coded hoses designed to withstand high-pressure refrigerant systems. With a working pressure range of 800-4000 PSI, these hoses provide a secure and leak-proof connection, ensuring efficiency and safety during use.

## Ergonomic & User-Friendly Design

Designed for convenience, this vacuum pump features a T-shaped heat sink for efficient heat dissipation, preventing overheating and ensuring long-lasting performance. The sight glass and oil level scale provide easy monitoring, so you can keep track of maintenance needs at a glance. The comfortable handle offers a firm grip, making it easy to carry and operate.

## Why Choose This Vacuum Pump and Manifold Gauge Set?

- **High-Efficiency Performance:** 1/5HP motor with 3.5 CFM displacement for powerful operation.
- **Accurate Pressure Measurement:** Manifold gauge set ensures precision when servicing HVAC systems.
- **Leak-Proof & Durable Hoses:** High-pressure-resistant rubber hoses for safe refrigerant handling.
- **Heat Dissipation Design:** T-shaped heat sink prevents overheating for extended use.
- **Ergonomic & Portable:** Lightweight with a comfortable grip handle for easy carrying.
- **Versatile Applications:** Ideal for A/C servicing, refrigeration, automotive cooling systems, and more.

## Perfect for Professionals & DIY Enthusiasts

Whether you're a professional HVAC technician or a DIYer dealing with home refrigeration, this vacuum pump and manifold gauge set is the perfect tool for the job. It provides the efficiency, precision, and reliability required for all your A/C and refrigeration servicing needs.

## Get the Job Done with Confidence!

Take control of your HVAC maintenance with this powerful air pump and gauge set. Designed for sturdiness and precision, it makes sure that your systems run smoothly and efficiently. Order yours today and experience hassle-free refrigeration maintenance!
