

1800W Portable Power Station 1152Wh for Outdoor Camping, Hiking & Emergencies

Description

Power You Can Trust, Wherever You Go

When you're out in the wilderness or dealing with unanticipated power blackouts, you require a reputable source of energy. This powerful portable power station offers an impressive 1152Wh capacity and 1800W continuous output, ensuring you have all the power you require for your devices and appliances. Whether you're camping, hiking, or on a fishing trip, this mobile powerhouse is designed to handle all your charging needs in one compact and efficient unit.

Fast Charging for Immediate Power

Never be left without power again. Thanks to the 1440W flash charging, this unit can be fully recharged in just 1.3-1.8 hours with a single AC cable. Need it even faster? The integrated solar input allows you to recharge via solar panels in 2.8-3.3 hours, so you're always ready for your next adventure. For the ultimate speed, the AC + solar double charge feature gets the power station fully charged in just one hour, making it the fastest solution for keeping your devices powered up.

Advanced UPS Function

With its advanced UPS (Uninterruptible Power Supply) feature, this portable power station ensures that power is restored instantly when needed. In case of an unexpected power outage, the switching time is just 20 milliseconds, so you won't even notice the disruption. It's the perfect solution for providing uninterrupted power to your critical devices at home or on the go.

Versatile Charging Options for All Your Devices

Designed to be versatile, this power station offers multiple output options for all types of devices. With two AC outlets, USB-A, USB-C, and even wireless charging, you can easily charge smartphones, laptops, cameras, lights, and small appliances. The pure sine wave inverter ensures that even sensitive electronics are powered safely and efficiently.

Why This Power Station Stands Out

- **High Capacity & Power Output:** 1152Wh capacity with a continuous output of 1800W, surge power up to 2700W, so you can power more devices without worrying about overloading.
- **Fast Charging:** 1440W AC charging fully recharges the station in 1.3-1.8 hours, and solar charging takes just 2.8-3.3 hours.
- **Solar Charging Ready:** Equipped with a 500W solar input, it offers efficient energy storage and keeps your power station topped up during outdoor adventures.
- **Advanced UPS Function:** Instant power recovery with a switching time of only 20 ms, ideal for both home and emergency use.
- **Wireless Charging:** Charge your phone or small devices wirelessly, adding more convenience to your charging experience.
- **Compact & Portable:** Despite its powerful performance, the unit is lightweight at just 35.27 lbs (16kg) and easy to transport with its convenient carry handle.

Perfect for Outdoor Adventures & Emergency Backup

This power station is not just for outdoor enthusiasts—it's also perfect for home backup during power outages or emergencies. Whether you're camping in the mountains, fishing by the lake, or facing an unexpected power failure, this power station ensures you'll always have power. Its multiple outlets and fast charging options provide reliable energy for all your critical devices, making it the ideal solution for any scenario.

Empower Your Life with Reliable, Portable Power

Don't let power limitations hold you back. Whether you need a portable charging solution for your next camping trip or a reputable backup for emergency situations, this power station has you covered. With its rapid charging capabilities, advanced UPS feature, and multiple outputs, it's built to meet all your power needs—whenever and wherever you require it most.
