

35W GaN USB-C Quick Charger with QC3.0 PD3.0 for Telephone, Pill & Laptop computer

Description

Power Up Fast — Anytime, Anywhere

Say goodbye to slow charging and bulky bricks. This compact 35W USB Type-C fast charger is built with cutting-edge GaN (Gallium Nitride) technology, offering more power in a smaller, lighter body. Whether you're charging your latest iPhone, a power-hungry laptop, or a trusty Android phone, this charger has your back with blazing speed and smart efficiency. It's your go-to charging solution at home, at the office, or on the go.

Equipped with both USB-A and USB-C ports, this charger supports multiple fast-charging protocols including QC3.0 and PD3.0. That means you can quickly top up virtually any modern device, from Apple to Xiaomi and everything in between. Intelligent charging ensures your gadgets are protected — automatically stopping when the battery is full to prevent overcharging.

This is not just a charger — it's your new everyday essential for all your devices.

Key Features

- **GaN Technology** — Delivers faster charging in a smaller, more efficient form factor
- **Dual Ports** — Includes USB-C and USB-A outputs for universal compatibility
- **Fast Charging** — Supports PD3.0, QC3.0, and other major protocols for rapid power delivery
- **Smart Charging** — Automatically adjusts output and stops when your device is full
- **High Compatibility** — Works with phones, tablets, laptops, and more

Why This Charger Stands Out

Thanks to GaN innovation, this charger is noticeably smaller and cooler-running than traditional silicon models — without sacrificing power. It's especially useful when traveling, commuting, or working

remotely. With 35W max output and intelligent distribution when using both ports, it can even handle charging your laptop and phone simultaneously. And with built-in safeguards, you can charge with confidence knowing your devices are protected from overvoltage, overcurrent, and overheating.

When to Use

This charger is perfect for:

- Quick top-ups during a busy day
- Charging while traveling — compact enough for your carry-on
- Multi-device households or work setups
- Anyone with USB-C devices looking for faster, safer charging

Experience the Power of Next-Gen Charging

Don't settle for outdated, slow chargers. Upgrade to smarter, faster, and more portable charging. Whether you're at your desk or 30,000 feet in the air, this 35W GaN charger is the dependable companion you never knew you needed. Fast, efficient, and intelligently built — it's charging, redefined.
