

3MP PTZ WiFi Camera Baby Monitor with 2.8" IPS Screen & Cry Detection

Description

Keep Your Baby Safe and Stay Connected Anytime, Anywhere

Ensure peace of mind and stay connected with your little one using our 3MP PTZ WiFi Baby Monitor Camera with a 2.8" IPS Screen. This smart camera combines advanced technology with a user-friendly design, making it the perfect solution for parents and caregivers. Whether you're working in the next room or miles away, you can monitor your baby with crystal-clear video and reliable audio, and even engage in two-way communication, all from your smartphone.

Advanced Features for Enhanced Security

Equipped with a 3MP resolution, this camera delivers crisp and clear footage day and night. The smooth pan and tilt functions allow you to remotely control the camera's 270° horizontal and 90° vertical range, giving you a complete view of the room. With intelligent humanoid detection, the camera can distinguish between human movement and other activity, ensuring you receive accurate alerts when it matters most.

The built-in cry detection technology is a game-changer for parents. When your baby cries, the camera immediately sends an alert to your phone, so you can respond quickly. The camera also supports motion detection, making it versatile enough to use for home security as well. The moment any unusual movement is detected, the system sends a notification straight to your device, ensuring you're always in the know.

Benefits You'll Love

- Real-time video and audio, keeping you connected with your baby no matter where you are.
- Two-way visual and audio calling allows you to interact with your baby or family members with ease.
- 3MP resolution offers sharp and detailed video for better monitoring.

- Smart cry detection alerts you instantly when your baby is in need.
- Pan and tilt features provide complete room coverage, eliminating blind spots.
- Motion detection keeps your home secure, sending real-time alerts straight to your phone.
- Supports up to 128GB micro SD card and optional cloud storage for video recording.
- Supports multi-user viewing, so multiple family members can check in at once.
- Night vision and weatherproof design make it perfect for both indoor and outdoor use.

Why This Camera Stands Out

What makes this camera special is its all-in-one functionality, combining baby monitoring, home security, and video communication in one sleek device. The cry detection feature is ideal for parents with infants, while the two-way video calling lets you stay close to your family even when you're far away. The easy app integration ensures you can check on your baby or home from anywhere at any time.

Take control of your peace of mind with this versatile and smart camera. It's the ultimate tool for modern parents and those who want to stay connected with their loved ones while ensuring safety and security at home.

Stay Connected. Stay Safe.

Get your 3MP PTZ WiFi Baby Monitor Camera today and experience the comfort of always being there when it matters most. With advanced features designed for modern families, it's more than just a camera – it's your digital guardian.
