

5KM 5GHz 867Mbps Outdoor WiFi Repeater and Access Point Extende

Description

Boost Your Network with Long-Range Outdoor WiFi

Experience seamless and stable wireless connectivity across vast outdoor spaces with the powerful 5KM 5GHz 867Mbps WiFi repeater and extender. This high-performance access point is designed for long-distance connections, perfect for video surveillance, data transmission, and ensuring uninterrupted connectivity in areas up to 3 miles (5 km). Whether you're working from a remote location, managing a farm, or setting up a long-range WiFi network for security cameras, this outdoor repeater ensures a reliable, high-speed connection every time.

Powerful Features for Maximum Coverage

Engineered for efficiency, this WiFi repeater features an external power amplifier and a 12dBi directional antenna, allowing it to capture and maintain a strong signal over long distances. The IP65 weatherproof enclosure ensures durability in any weather conditions, from rain to extreme heat, making it an ideal solution for both residential and industrial applications.

- **5GHz 867Mbps speed:** Enjoy fast, stable, and smooth wireless data transmission.
- **12dBi dual polarization antenna:** Maximizes range and maintains a strong, clear signal over 3 miles.
- **4 LAN ports:** Easily connect multiple wired devices for a streamlined network.
- **Weatherproof and durable:** IP65-rated enclosure protects the device from dust, rain, and harsh temperatures.
- **6000V lightning protection:** Built-in protection safeguards your network during electrical storms.
- **Supports multiple modes:** Use as an access point (AP), station, or WISP for versatile network management.

When to Use This Product

This WiFi repeater is perfect for outdoor environments where a stable and long-range connection is necessary. It's ideal for large properties, outdoor events, farms, and other remote locations that need reliable internet access. The unit is built to withstand various weather conditions, making it suitable for year-round use in any climate.

Why Choose This Outdoor WiFi Extender?

What makes this product truly special is its ability to extend your WiFi range up to 3 miles, ensuring high-speed connectivity even in the most distant areas. The 12dBi antenna boosts signal strength, while the weatherproof design keeps it running efficiently in any environment. Whether you need internet for security cameras, remote workstations, or outdoor projects, this WiFi repeater provides a stable and powerful solution.

Benefits You'll Love

- **Expand your network range:** Ideal for remote areas, ensuring uninterrupted connectivity up to 3 miles away.
- **Weatherproof design:** The IP65 enclosure allows it to perform in any weather, from rain to heat.
- **Multiple devices supported:** Connect up to 4 wired devices through LAN ports for efficient data transfer.
- **Flexible modes:** Choose from AP, station, or WISP mode to fit your specific networking needs.
- **Lightning protection:** Keep your equipment safe during electrical surges with built-in 6000V protection.

Upgrade Your Outdoor Connectivity Today

Take control of your outdoor WiFi network with this high-performance, long-range repeater and extender. Engineered to provide reliable, high-speed internet across vast distances, this device is the perfect choice for anyone looking to extend their wireless network outdoors. Install it today and experience seamless connectivity no matter where you are.
