

5X Enlarged Human Ear Anatomy Model

Description

Explore the Wonders of Hearing with our 5 Times Enlarged Human Ear Model

Unveil the intricacies of the human ear like never before with our 5 Times Enlarged Human Ear Anatomy Model. Crafted with precision from PVC plastic, this realistic-looking model is a visual masterpiece, featuring numbered and colored structures for easy identification.

- **Labeled Structure:** Clearly numbered and painted structures for effortless identification, facilitating an in-depth understanding of the ear anatomy.
- **Dismountable Design:** Two removable parts allow for detailed observation, making it an ideal tool for teachers, biologists, and doctors in schools, laboratories, and hospitals.
- **Enlarged 5 Times:** The model is magnified five times the size of a human ear, offering a detailed and transparent demonstration of the inner ear, middle ear, and external ear.
- **Study PVC Material:** Constructed from high-quality PVC plastic, our model ensures durability, rigidity, and resistance to wear, providing a reliable and long-lasting educational tool.
- **Far-ranging Scenarios:** Perfect for classrooms, hospitals, and laboratories, this model contributes significantly to teaching and research in the field of human ear anatomy.

Our commitment to quality extends beyond the product itself. As a leading brand specializing in equipment and tools, we bring you not just a model but a gateway to enhanced learning.

Key Features

- **Numbered Structures:** Accurate labeling for easy identification of specific ear parts.
- **Removable Parts:** Two dismountable pieces for separate display and easy replacement.
- **5 Times Enlarged:** Detailed representation with a 5x magnification for authentic analysis.
- **PVC Material:** High-quality PVC plastic ensures durability and rigidity, with an ABS base for added stability.

- **Stable Base:** Fixed base with 3 bottom mounting screws for transcendent stability during teaching or presentations.
- **Wide Application:** Perfect for classrooms and doctors' offices, aiding in teaching and studying ear structure and sound wave travel.

Specifications

- **Color:** Multi-Color
- **Material:** PVC + ABS
- **Enlarging Times:** 5
- **Item Weight:** 3.3 lbs/1.5 kg
- **Item Dimensions:** 12x6x8 in /30x15x20 cm

Enhance Your Learning Today!

Bring the fascinating world of human ear anatomy to life with our 5 Times Enlarged Human Ear Model. Elevate your teaching and research experiences with a tool designed for precision, durability, and affordability. Order now and embark on a journey of enhanced learning!
