

## Gaming Sound Box with Stereo Surround Sound and RGB Lights

### Description

### Immerse Yourself in Outstanding Aural Effects

Elevate your gaming, movie-watching, and music-listening experiences with our Gaming Sound Box. Designed to deliver shocking rich bass and clear highs, this sound box provides a 360° all-around sound effect that creates an immersive atmosphere. Whether you're in the heat of a gaming session, enjoying a blockbuster movie, or relaxing to your favorite tunes, this sound box ensures you enjoy every moment with crystal-clear sound.

### Uniquely Crafted Design for Audio Excellence

The Gaming Sound Box features a stereo sound output with a 6° angled design, creating a captivating sound stage that surrounds your ears. This thoughtful design results in unparalleled audio immersion and clarity, allowing you to hear every detail with precision. The touch-sensitive RGB and volume keys make adjusting the sound output a breeze. A short or long press instantly changes the volume, and a quick press of less than 2 seconds mutes the sound effortlessly. The auxiliary box includes a power key for easy control, letting you mute or turn the power on/off with a simple press.

### Experience a Mesmerizing RGB Light Show

Not just a sound box, this device doubles as a unique gaming theme light. With a touch-sensitive RGB key, you can switch between 11 different colors, including single color, breathing gradient, and dynamic gradient modes. The intelligent memory function ensures that both your volume and lighting settings are remembered from your last use, providing a consistent and personalized experience everytime you power on the device.

## Easy Compatibility and Intelligent Design

Compatible with a wide range of devices, including desktop computers, laptops, TVs, monitors, and mobile devices featuring a 3.5mm audio jack, this sound box is easy to use with its USB connector. Simply connect to a 5V/1A power supply for optimal performance. The intelligent memory function further enhances your experience by automatically setting the volume and RGB lighting effects to your last used settings.

## Product Features
