Refueling just got easier with the *Gas Can Nozzle Replacement Kit*. Designed to fit most 1/2/5/10 gallon gas cans, this versatile kit offers everything you need for a hassle-free, spill-proof refueling experience. Whether you're fueling up a lawnmower, boat, or generator, this kit ensures precise and easy pouring every time. With an extended spout, multiple collar caps, and vent caps, this replacement kit is perfect for revamping your old or worn-out gas cans. Built from high-quality PE and PP materials, the nozzles are durable, flexible, and designed to withstand the rigors of frequent use.

All-in-One Gas Can Replacement Kit

This complete replacement kit comes with everything you need to upgrade your gas can. It includes a yellow spout, two threaded collar caps (coarse and fine thread), a nozzle cover, a sealing washer, and two types of vent caps. Installation is quick and easy, making it a breeze to refresh your gas can with a brand-new nozzle that prevents spills and ensures smooth fuel flow. Additionally, a drill bit is included for vent cap installation, making it suitable for cans with or without existing vents.

Why Choose This Gas Can Nozzle Kit?

- **Perfect Compatibility:** Fits most 1/2/5/10 gallon oil cans with spout openings between 1.7 to 1.82 inches, making it a versatile choice for various gas can sizes.
- **Extended Nozzle for Easy Pouring:** The 8.1-inch long spout ensures greater reach and

flexibility, reducing spills and splashes.

- **Durable Materials:** Made from high-quality PE and PP, these nozzles and hoses are built to last and can withstand bending without breaking.
- **Anti-Spill Design:** The threaded caps and rubber sealing rings ensure a leak-proof and mess-free fueling experience, even during transportation.
- **Complete Kit with Vent Caps:** Includes two types of gas can vent caps for cans with or without existing vents, providing enhanced air flow for faster pouring.
- **Easy Installation:** Comes with a drill bit for vent cap installation, ensuring that even non-vented gas cans can benefit from improved flow and reduced glugging.
