

## High-Definition 152/1900 Astronomical Telescope with Automatic Star Search

### Description

### Discover the Wonders of the Night Sky

Embark on a celestial journey like never before with our High-Definition 152/1900 Astronomical Telescope. Equipped with a Maxtorf-Cassegrain Reflex System and a robust 152mm aperture, this high-magnification telescope brings the mysteries of the universe right to your backyard. Whether you're a seasoned astronomer or a curious beginner, this telescope is designed to elevate your stargazing experience.

## Product Features

- Magnification Power: 380X, bringing distant galaxies within reach.
- Focal Length: 1900mm for deep sky exploration.
- Ultra-wideband Lens Coating (SMC): Ensures clear, crisp images.
- Objective Lens Diameter: 152mm, for superior light gathering.
- Durable Metal Construction: Ensures longevity and stability.
- Model Number: 60-15219, a testament to quality and precision.
- Type: Monocular, for a focused, detailed view.

## Unique Benefits

Our telescope stands out with its advanced features and user-friendly design. The automatic star search function simplifies navigation of the night sky, making it perfect for both beginners and experienced users. The high-definition optics provide stunning clarity and detail, while the green antireflection film and multi-layer aluminum film coating minimize glare and maximize your viewing experience.

## When and Where to Use

This telescope is ideal for various astronomical observations, from moon craters to distant nebulae. Its portability and sturdy equatorial mount make it perfect for backyard stargazing, remote expeditions, or educational purposes. The 1.25-inch eyepiece offers a comfortable viewing experience, and the included accessories enhance its functionality.

## Why Choose This Telescope?

Our High-Definition 152/1900 Astronomical Telescope is not just an instrument; it's a gateway to the cosmos. Its high magnification, excellent light-gathering capabilities, and easy-to-use features make it special. Whether you're capturing breathtaking astrophotographs or simply enjoying the night sky, this telescope will transform your astronomical adventures.
