

High-end Automatic Mechanical Skeleton Tourbillon Watch for Guys

Description

Discover Timeless Beauty and Accuracy Engineering

Step up your design video game with this striking high-end automated watch developed for guys who value great workmanship and advanced style. Including a fascinating skeleton tourbillon, this mechanical watch exposes the complex inner functions that make every 2nd count. Its streamlined, endless dial and luminescent hands produce a contemporary yet timeless appearance ideal for organization or official events.

Unequaled Functions Developed for Efficiency

This watch is crafted from premium stainless-steel, making sure sturdiness while preserving a polished, stylish look. The sapphire crystal dial window provides remarkable scratch resistance and clearness, while the water resistance as much as 165 feet (5 Bar) secures your wrist watch throughout everyday activities. A push-button surprise clasp ensures a protected and comfy fit on your wrist, with a band length of approximately 6.8 inches and width ranging between 0.8 to 0.9 inches. The 1.6-inch round case provides a bold yet balanced presence, and the watch's thickness at just under half an inch adds to its refined profile.

Why This Mechanical Watch Stands Out

Powered by a reliable automatic self-wind and mechanical hand-wind movement, this watch offers precision without the need for batteries. Its shock-resistant design and screw-down crown enhance durability, making it resilient against everyday impacts and water exposure. The luminous feature

ensures readability in low light, while the skeleton design offers a unique glimpse into the craftsmanship behind your timepiece.
