

## Solar Water Pump 12V DC – Deep Well Submersible Pump for Watering & Off-Grid Usage

### Description

### Utilize the Power of the Sun for Reliable Supply Of Water

Bid farewell to power constraints and hi to an environment-friendly, off-grid water option. This 12V DC solar water pump is created for deep wells, supplying a consistent supply of water for farms, cattle ranches, gardens, and remote areas. Whether you require watering for crops or a trusted water source for animals, this high-performance pump finishes the job effectively and sustainably.

### Powerful Efficiency for Deep Well Water Transfer

With an optimal head of 230 feet and a circulation rate of 1.6 GPM, this solar-powered submersible pump is constructed for medium-distance water transfer. It can dive as much as 98.4 feet deep, making sure a steady supply of water even in deep wells. Its high-speed carbon brush DC motor runs at over 2600 RPM, providing exceptional effectiveness without power loss.

### Long Lasting and Weather-Resistant Style

Developed to last, this deep well pump includes a sealed IP68 water resistant body, permitting it to work dependably while immersed. The double-layer stainless-steel filter mesh efficiently eliminates particles and particles, avoiding blocking and extending the pump's life expectancy to over 1,200 hours. No matter the season, this pump provides constant efficiency.

### Basic Setup and Versatile Usage

Created with a basic outlet for simple compatibility, this solar water pump links easily to the majority of pipelines and fittings. With a generous 10-foot power cord, you have the flexibility to position the pump exactly where you need it. Simply connect it to a 12V solar panel or battery pack, and enjoy a

continuous water supply without the need for an external power grid.

## Why Choose This Solar Water Pump?

- **Solar Powered:** No electricity required – just connect to a 12V battery or solar panel.
- **Deep Well Capability:** Submersible up to 98.4 feet with a max head of 230 feet.
- **Reliable Performance:** High-speed motor delivers a steady flow of 1.6 GPM.
- **Durable Construction:** Stainless steel filter and IP68 waterproof rating for long-lasting use.
- **Easy Installation:** Standard outlet design fits most pipelines with a 10-foot power cable for versatility.

## The Perfect Solution for Remote Water Needs

Whether you're running a farm, maintaining a ranch, or require a reliable water source off-grid, this solar-powered deep well pump delivers the performance you need. Enjoy a hassle-free supply of water powered by the sun—no electrical connections, no concerns. Purchase a sustainable option today and keep your water streaming!
