

## Whole House Spin Down Sediment Water Filter

### Description

## Ultimate Protection for Your Home Water System

Discover the ultimate solution in water filtration with our innovative Whole House Spin Down Sediment Water Filter. Engineered to safeguard your entire home's water supply, this advanced prefilter system stands as your first line of defense against common water impurities. Its 40-micron stainless steel mesh efficiently traps sand, rust, limestone, and other particulate matter, ensuring only the cleanest water flows through your pipes.

### Key Features & Benefits

- **Comprehensive Filtration:** Equipped with a 40-micron stainless steel filter to capture a wide range of particulates.
- **Extended Equipment Life:** Protects appliances and plumbing from sediment damage, prolonging their lifespan and performance.
- **Effortless Backwashing:** Features a water pressure-driven rotating scraper for easy and efficient filter cleaning.
- **Real-Time Pressure Monitoring:** Built-in gauge for monitoring water pressure, ensuring optimal operation.
- **Durable Construction:** Made with food-grade materials, including a heavy-duty transparent shell and lead-free brass components.
- **Flexible Installation:** Compatible with various pipe sizes, facilitating easy integration into your existing water system.

### Why Choose Our Pre Filter System?

Ideal for both municipal and well water sources, our pre filter system is a versatile solution for any household. It's not just a filter; it's a comprehensive water quality management system. Whether it's ensuring the longevity of your water-related appliances or providing peace of mind about the water you

use daily, our system stands out with its efficiency and ease of use.

## Product Specifications

- 40 micron water yield: 5000L/h
- Working pressure: 0.1-1.0MPA (1bar-10bar)
- Net weight: 1kg
- Product size: 29.5CM\*15.5CM\*9CM

## When to Use This Product?

The ideal scenario to use our Whole House Spin Down Sediment Water Filter is in any home, especially those experiencing issues with sediment in their water supply. It's particularly beneficial for households with older plumbing systems or those using well water.

## What Makes Our Product Special?

What sets our product apart is the combination of high-quality materials, innovative design, and user-friendly features. The automatic backwashing system ensures low maintenance, while the real-time pressure monitoring provides an added layer of security for your home's water supply.

## Take the First Step Towards Purer Water

Don't wait any longer to protect your home's water supply. Invest in our Whole House Spin Down Sediment Water Filter today and enjoy the peace of mind that comes with knowing your water is clean and your appliances are safe.
