

Wireless Backup Camera System with 4.3-inch HD Monitor

Description

Experience Safer Parking with a Wireless Backup Camera System

Make every parking maneuver safer and more convenient with our Wireless Backup Camera System featuring a crystal-clear 4.3-inch HD monitor. This system offers an easy, wireless installation that takes just minutes, and the stable digital signal ensures you always have a clear, interference-free image. Whether you're parking in tight spaces or navigating through difficult weather conditions, this backup camera is designed to provide enhanced visibility and peace of mind.

Crystal HD Image & Super Night Vision for Ultimate Clarity

Equipped with the advanced PC1058 sensor, this wireless backup camera delivers vivid, high-definition images in any lighting conditions. Its superior night vision, with a 0.1-lumen rating, lets you see clearly even in the darkest environments. Never worry about blind spots again—what you see behind your car is exactly what's happening in real-time.

Quick and Easy Installation

Installing this backup camera is hassle-free. Simply power the monitor with the included cigarette lighter, and connect the camera to your vehicle's reverse light. You'll have it set up and running in just two easy steps—no complicated wiring or drilling required.

Stable Digital Signal for Reliable Performance

Our wireless backup camera system uses 2.4G wireless technology to provide a stable, interference-free signal up to 33 feet, making it perfect for mid-size vehicles like vans, SUVs, trucks, and trailers. You can count on a steady image, no matter where you're driving.

Parking with Precision

This backup camera comes with DIY parking lines that can be adjusted to perfectly fit your vehicle's dimensions. Whether you're fitting into a tight parking spot or navigating tricky spaces, you can customize the guidelines or turn them off completely for a personalized experience.

Built to Last in Any Weather

The IP68 waterproof rating ensures the camera will work flawlessly in all weather conditions—rain, fog, or snow. No matter what, the camera lens stays clear, delivering a sharp, fog-free view.

- Crystal-clear 4.3" HD monitor for superior image quality
- Super night vision with 0.1-lumen rating for visibility in low light
- Wireless installation in just two simple steps
- Stable 2.4G wireless signal up to 33 feet
